

Untitled 1: 300 x 300 res 300; transparent - 6.5 sec. HEADER.

Untitled 2: 300 x 300 res 300; white - 7.0 sec. Same header. Color info stored at end (?) Nothing in between. End is 4 bars halved

Untitled 3: 300 x 300 res 300; black - 7.0 sec. Same header. Color info stored at end. Nothing in between. 4 bars - one top half, and three almost full bars.

Untitled 4: 300 x 300 res 300; maroon - 1.5 sec. different/shorter header. Something of color info stored at the very end, but also a continuous bar in between header and end - above median.

Untitled 5: 300 x 300 res 300; cyan - 1.5 sec. same header as maroon. End color info different, but also a continuous bar in between header and end - under median.

Untitled 6: 600 x 600 res 300; white - 26.0 sec. Same header. End - 4 sounds=bars with different higher pitch than Untitled 2 audio.

Untitled 7: 200 x 600 res 300; white - 9.0 sec. Same header. End - 4 sounds=bars with different pitch again. First bar wider and higher pitched. Following three higher pitched.

Untitled 8: 200 x 1200 res 300; white - 18.0 sec. Same/similar header. End - same or similar tone as Untitled 7 but wider bars/longer sound.

Untitled 9: 300 x 300 res 300; black with white text - 7.5 sec. Same header. Flattened image.

Untitled 10: 300 x 300 res 300; black with white text - 4.0sec. PHOTOSHOP file (not tiff); Layered image. Non rasterized text. Different header. Still distinct header and end, but different. Middle information more complex. All of this sounds bitchin'

Untitled 11: 300 x 300 res 300; black with white RASTERIZED text. 9.5 sec. Middle sounds similar to flattened tif Untitled 9. End/footer is more complex and longer.

Untitled 12: 100 x 100 res 300; black - 1.3 sec. DIFFERENT HEADER and FOOTER. Middle bit complex even though nothing other than black. wtf?

Untitled 13: 100 x 100 res 300; white - 1.3 sec. same as 12 but different footer - wider first bar and other slight differences.
